

# Final Exam: Complex Analysis

Taishan College, Shandong University

**Instructions:** This is a closed book, closed notes exam! Show all details in your proof in English. You have two hours to complete this test. Good luck!

— 14:00-16:00, Jan. 5, 2017. G.H.J.

注意事项: 卷面分5分, 试题总分95分. 其中卷面整洁, 书写规范(5分); 卷面较整洁, 书写较规范(3分); 书写潦草, 乱涂乱画(0分).

**1.(10 points)** Suppose the function  $f : \mathbb{D} \rightarrow \mathbb{C}$  is holomorphic. Show that  $2|f'(0)| \leq d$ , where  $d = \sup_{z,w \in \mathbb{D}} |f(z) - f(w)|$ .

**2.(40 points)** (1), Evaluate the following integrals

$$\int_{|z|=\frac{1}{6}} \frac{1}{z(3z+1)} dz; \quad \int_{-\infty}^{\infty} \frac{x \sin x}{x^2 + a^2} dx (a > 0); \quad \int_0^{\infty} \frac{(\log x)^2}{x^2 + 1} dx.$$

(2), Find the number of zeros, counting multiplicities, of the polynomial  $z^5 + z^3 + 5z^2 + 2$  in the annulus  $1 < |z| < 2$ .

(3), Find a one-to-one conformal map of the semidisc

$$\Omega = \{z \in \mathbb{C} : \Im z > 0, |z - 1/2| < 1/2\}$$

onto the upper half-plane  $\mathbb{H}$ .

(4), Find the Hadamard products for the function  $f(z) = \cos \pi z$ .

**3.(20 points)** (1), State the Schwartz lemma.

(2), Let  $f(z)$  be holomorphic in  $\mathbb{D}$  and  $|f(z)| \leq 1$  for all  $z \in \mathbb{D}$ .

Prove that

$$\frac{|f(0)| - |z|}{1 + |f(0)||z|} \leq |f(z)| \leq \frac{|f(0)| + |z|}{1 - |f(0)||z|}, \quad z \in \mathbb{D}.$$

**4.(15 points)** (1), Prove that  $\Re s > 0$

$$\zeta(s) = \frac{s}{s-1} - s \int_1^{\infty} \frac{\{x\}}{x^{s+1}} dx$$

where  $\{x\}$  is the fractional part of  $x$ .

(2), Compute the values of  $\text{Res}_{s=1} \zeta(s)$  and  $\zeta(0)$ .

**5.(10 points)** The total number of poles of an elliptic function in the fundamental parallelogram is at least two.
